

PROJECTS

GWC Project's extensive planning, procurement and logistics experience has made it the front-runner in providing turnkey project logistics solutions. Whether handling the largest of shipments with the restrictions of difficult or remote areas or at loading bays, the company's specialized single-point control system allows for full coordination of the project from source to destination. Offering 24/7 online tracking of cargo, with operations overseen by a risk management team, the company seeks to assure safety compliance is being adhered to at every step.

Passion

GWC encourages a culture of performance at every level, ensuring customer loyalty through delivering world-class services, solutions, and infrastructure. By acting as the client's diligent partner, GWC will tailor logistics and supply chain solutions that increases efficiency and reduces CAPEX.

Freight offices worldwide

GWC Projects continues to provide a standard of reliability in the services provided to clients in the oil and gas, energy and water desalination sectors, as well as support for offshore provision companies, among many more.

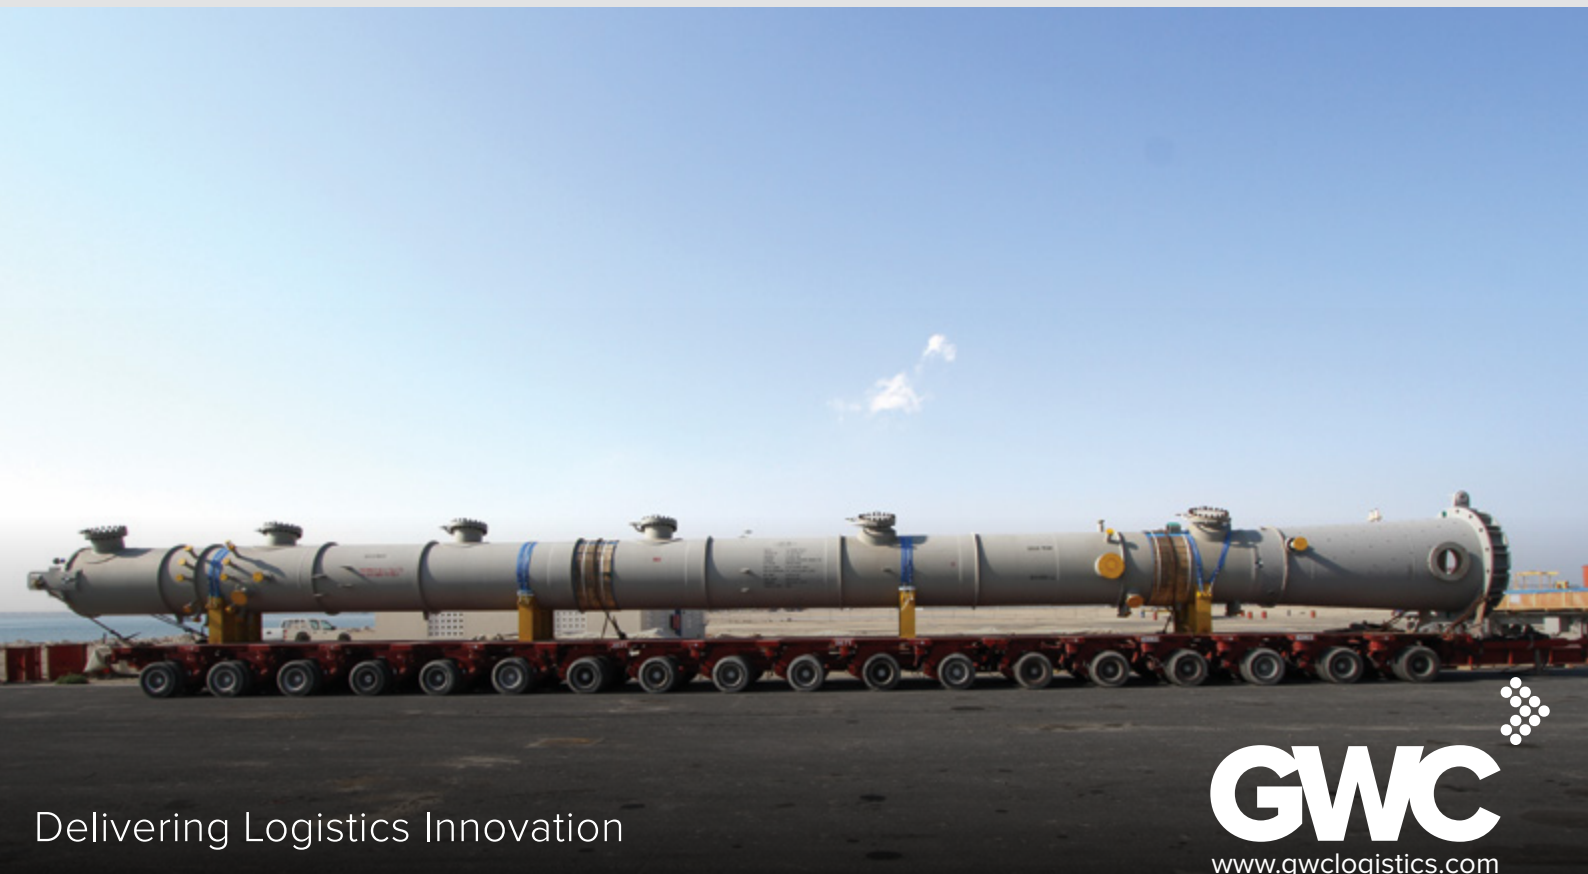

Oil and gas sector

GWC Projects completed the transport of a nearly 1,500-ton distillation tower on behalf of a major local oil and gas company. The project required the drafting of a method statement and plotting a course from Korea to Ras Laffan sea port to the project site.

Solar energy plants

GWC assisted in the delivery of highly sensitive technology for a local solar energy project in the State of Qatar, including the transport of a 52-meter and 54-meter towers, ensuring its safe transport from the sea port to the project site.

Experience and expertise are pivotal to the process of delivering large and complex projects – contact us today to see how we can help you by calling: +974 4449 3000 or email us at: info@gwclogistics.com
