

# HAZMAT

GWC Hazmat's facilities were the first ISO-Certified and government approved to offer clients with comprehensive end-to-end Hazmat logistics solutions in the State of Qatar. We procure goods and provide inventory management and transport as per the customer requirements. Located advantageously at the two industrial cities of Ras Laffan and Messaieed, these facilities are equipped to handle over 60 classifications of hazardous materials. Our facilities are equipped with 24/7 security and CCTV monitoring, in additions to industry specific fire-fighting systems.

## Passion

GWC encourages a culture of performance at every level, ensuring customer loyalty through delivering world-class services, solutions, and infrastructure. By acting as the client's diligent partner, GWC will tailor logistics and supply chain solutions that increases efficiency and reduces CAPEX.

## GWC HAZMAT Service Span

GWC Hazmat leverages the locational advantage and the expansive capabilities of its major petrochemical hubs serving clients in the oil and gas, petrochemical, chemical, manufacturing, and raw material processing industries.

### Oil and gas sector

GWC Hazmat provides end-to-end hazmat warehousing solutions to major oil and gas companies, including their chemical warehousing for the materials used in their plants and offshore, with monthly deliveries and dispatches to various offshore rigs.

### Manufacturing

GWC Hazmat has been serving one of the largest aluminum plants ever launched, providing for their supply chain since the beginning of 2009 when the first raw materials arrived in Qatar, safely storing and handling over 50,000 tons of raw materials.

Hazmat logistics is a crucial element of the safe and secure operations for several heavy industries – contact us today to see how we can help you by calling: +974 4449 3000 or email us at: [info@gwclogistics.com](mailto:info@gwclogistics.com)
