

TRANSPORT

GWC has distinguished itself by assembling the largest transport fleet in Qatar, offering clients the advantage of a complete logistics value chain incorporated into their service offering. The company's operations have evolved and expanded, offering nearly every type of transportation available, with regional reach extending to Jordan and Iraq by land. Backed by state-of-the-art tracking and road transport analysis and optimization systems, we can deliver customized and cost-efficient solutions that meet our clients' requirements in various industries.

Passion

GWC encourages a culture of performance at every level, ensuring customer loyalty through delivering world-class services, solutions, and infrastructure. By acting as the client's diligent partner, GWC will tailor logistics and supply chain solutions that increases efficiency and reduces CAPEX.

SQM

GWC Transport proudly manages a wide variety of transportation options specifically designed and maintained for various industries, which include FMCG, food and beverage, relocations, fine art logistics, project logistics, and container land transport services.

Oil and gas sector

GWC supports the efforts of local chemical and petrochemical marketing and production companies by arranging the safe transport of Caustic Soda and Hydrochloric Acid within the nation, providing them with 10 specialized Hazmat tankers, and properly clearing of the materials with the authorities.

Container repair services

As a value added service, GWC Transport offers clients container haulage and repair services at its container depot in the Logistics Village Qatar. More than 3,000 containers pass through the site monthly, and these are repaired and repurposed on behalf of the clients.

Projects of large multitude or with specific needs can rely on a company that owns largest fleet of diverse transport vehicles – contact us today to see how we can help you by calling: +974 4449 3000 or email us at: info@gwclogistics.com
